Introduction - World History–Social Science

The following released test questions are taken from the World History–Social Science Standards Test. This test is one of the California Standards Tests administered as part of the Standardized Testing and Reporting (STAR) Program under policies set by the State Board of Education.

All questions on the California Standards Tests are evaluated by committees of content experts, including teachers and administrators, to ensure their appropriateness for measuring the California academic content and skills standards in World History–Social Science. In addition to content, all items are reviewed and approved to ensure their adherence to the principles of fairness and to ensure no bias exists with respect to characteristics such as gender, ethnicity, and language.

This document contains released test questions from the California Standards Test forms in 2003, 2004, 2005, 2006, 2007, and 2008. First on the pages that follow are lists of the standards assessed on the World History–Social Science Test. Next are released test questions. Following the questions is a table that gives the correct answer for each question, the content and skills (where applicable) standard that each question is measuring, and the year each question last appeared on the test.

The following table lists each reporting cluster, the number of items that appear on the exam, and the number of released test questions that appear in this document.

In selecting test questions for release, three criteria are used: (1) the questions adequately cover a selection of the academic content standards assessed on the World History–Social Science Test; (2) the questions demonstrate a range of difficulty; and (3) the questions present a variety of ways standards can be assessed. These released test questions do not reflect all of the ways the standards may be assessed. Released test questions will not appear on future tests.

CALIFORNIA ANALYSIS SKILLS STANDARDS FOR WORLD HISTORY

History and Social Science Analysis Skills (World History)

Chronological and Spatial Thinking

CS1. Students compare the present with the past, evaluating the consequences of past events and decisions and determining the lessons that were learned.

CS2. Students analyze how change happens at different rates at different times; understand that some aspects can change while others remain the same; and understand that change is complicated and affects not only technology and politics but also values and beliefs.

CS3. Students use a variety of maps and documents to interpret human movement, including major patterns of domestic and international migration, changing environmental preferences and settlement patterns, the frictions that develop between population groups, and the diffusion of ideas, technological innovations, and goods.

CS4. Students relate current events to the physical and human characteristics of places and regions.

Historical Research, Evidence, and Point of View

HR1. Students distinguish valid arguments from fallacious arguments in historical interpretations.

HR2. Students identify bias and prejudice in historical interpretations.

HR3. Students evaluate major debates among historians concerning alternative interpretations of the past, including an analysis of authors' use of evidence and the distinctions between sound generalizations and misleading oversimplifications.

HR4. Students construct and test hypotheses; collect, evaluate, and employ information from multiple primary and secondary sources; and apply it in oral and written presentations.

Historical Interpretation

HI1. Students show the connections, causal and otherwise, between particular historical events and larger social, economic, and political trends and developments.

HI2. Students recognize the complexity of historical causes and effects, including the limitations of determining cause and effect.

HI3. Students interpret past events and issues within the context in which an event unfolded rather than solely in terms of present day norms and values.

HI4. Students understand the meaning, implication, and impact of historical events while recognizing that events could have taken other directions.

HI5. Students analyze human modifications of a landscape, and examine the resulting environmental policy issues.

HI6. Students conduct cost/benefit analyses and apply basic economic indicators to analyze the aggregate economic behavior of the U.S. economy.

At least twenty-five percent of the content questions must include an element of the skills standards.
